

Citra TurboClean Aggressor & Ultra Turbo Concentrate

Cleans like a Solvent
Safe As Baby Shampoo
Incredibly Economical To Use

Citra TurboClean Aggressor is a breakthrough technology cleaner/degreaser that combines the safety of microbial, oil-eating cleaners with the cleaning effectiveness of caustic, higher pH cleaners. For the first time ever you can clean the toughest oils, grease and grime quickly and effectively with a water based cleaner that carries a HMIS rating of 1,0,0,A.

What makes Citra TurboClean Aggressor so different from other industrial cleaning products? Created from the same technology used to clean up major oil spills, Citra TurboClean Aggressor contains nature's own janitors – billions of friendly oil eating microbes that devour grease and oil with enzymatic action. Since Citra TurboClean has to be safe enough for these living microbes it is inherently safer for you, the end user. No more exposure to dangerous solvents and their associated health risks – skin rash and burns, asthma, even cancer. Citra TurboClean Aggressor literally cleans like a solvent but is non-hazardous, non-flammable and has zero VOC's. We took our base formulation for Citra TurboClean (GM and UAW approved aqueous parts washing solution) and enhanced the performance by adding builders and surfactants which help kick out tough soils. This allows Aggressor to quickly penetrate stubborn oils and grime on all surfaces.

What it does now – Citra TurboClean Aggressor quickly cleans tough stains, oils and grease in spray and wipe, mop and bucket and floor scrubber applications. Citra TurboClean Aggressor is also ideally suited for use in aqueous partwashers. If you are currently using a solvent, mineral spirit or high/low pH, hazardous cleaner Citra TurboClean Aggressor gives you a safer, non-hazardous alternative that cleans effectively and offers downstream environmental benefits.

What it does over time – Citra TurboClean Aggressor's oil eating microbes will consume oils, grease and fuels in aqueous partwashers, drains and catch basins. As they are non-hazardous you can also eliminate hazardous waste haul away charges and their associated manifest liabilities. TurboClean gives you the option to have the power associated with solvent cleaners without the associated health and liability risks – a better and safer workplace for all.

Cleans like it's dangerous...but it's not!
