

NAVIGATOR AIR STACK SERIES

Contemporary mesh style and comfort in a flex-back chair

- Back flex operates via a torsion-bar mechanism that allows 12° of recline with gradually increasing resistance
- Mesh back conforms to your back for a tailored fit while the open weave improves circulation around the body for greater thermal comfort; available in black or grey mesh
- Integral lumbar support for added comfort
- 1.75" thick upholstered seat for long-term comfort
- Choose sled base or 4-leg base; all models stack 5 high on floor or 4 high on dolly and are available powder coat painted or chrome plated
- Optional fixed arms are cantilevered, seeming to float right where you need them
- Various glides available for different flooring types:
 - 4-leg: plastic, steel
 - Sled: no glides, black plastic, non-marring plastic, non-skid rubber, or stainless steel
- Laminate tablet arms available in two sizes
- Full Navigator Air line includes stacking and nesting chairs
- 300 lb. weight capacity
